Zhitkovich, A., 217

SUBJECT INDEX TO VOLUME 40

8-hydroxydeoxyguanosine as a urinary biomarker, 391
Abberations to measure radiation-induced changes of cell sensitivity, 281
Abberations to convert environmental exposure to dose, 278
Abberations as markers of dose, 277
Acute hyperoxic injury, 2
Allergic dermatitis potential of hexavalent chromium, 615
Aneuploidy, 354
Antibody purification and transfer, 122
Arsenic and bladder cancer, 224
Arsenic and bladder cell micronuclei frequency, 229
Arsenic-induced bladder cell micronuclei, study design, 230

β-NF treatment and dicumarol addition on O-dealkylase activities, 181
Biologic specimen collection, 441
Biomarkers in occupational health, 359
Biomarkers of human exposure to benzene, 377
Biomarkers and molecular epidemiology, 203
Biomarkers, overview, 206
Biomarkers for reproductive effects, 423
Biomonitoring of chromium, information relevant to, 561
Biomonitoring for chromium, 557
Birth defects risk factor surveillance, 435
Bladder cell micronuclei as arsenic biomarkers, 223
Brain fibronectin and irradiation, 263
Bronchoalveolar in rats, 3
Buccal cell micronucleus, 230

Cadmium-109 metabolism in mice, 531
Capillary electrophoresis, 148
Carcinogens and studies of micronuclei in exfoliated cells, 225
Cathepsin B in macrophages, 549
Combined capillary electrophoresis-mass spectrometry, 150
Comparison of O-dealkylation specificity, 184
CYP1A1 and lung cancer, 304
CYP1A1 gene, genotype and function of the, 309
CYP2D6 polymorphism, 301
Cytochromes P-450 and human health, 289

Dermal pyrene uptake in rats, 603
DNA biomarkers for cancer risk assessment, 247
DNA-protein cross-links as a biomarker, 217

Effects of hyperoxia in rats, 3
EIS-MS of large molecule and their noncovalent complexes, 154
Epidemiologic applications of biomarkers, 389
Epidemiology of insulin-dependent diabetes mellitus worldwide, 347
EROD enzyme assay, 311
Ethylene oxide, recent research on, 209
Evidence that arsenic is clastogenic, 229
Examination of kinetics of P-450-mediated O-dealkylation in single cells, 185
Extracting chromium with human sweat, 587

Fluorescent in situ hybridization, 349
Fourier-transform ion cyclotron resonance MS, 154

Genotype analysis, 310
Groundwater pesticides, 15

Herbert M. Parker lecture, radiation induced cancer-risk, 493
Histone sequence and modification, 159
HPLC separation of proteolytically derived peptides, 163
Human cytochrome P-450 polymorphisms, 300
Human behavioral neurotoxicology test batteries, 387
Human cytochromes P-450, 294
Human brain expression of cytochrome P-450s and microsomal epozide hydrolase, 317

IgG_1-mediated pulmonary hypersensitivity, 117
Immediate and late-onset airway responses, 123
In vitro systems for studying human metabolism of foreign compounds, 296
Induction of micronuclei by iodine-131, 367
Isocyanates, 514

Lymphocyte isolation, culture, and analysis, 369

Mass spectrometry of acrylamide adduct protein, 161
Measurement of lavage parameter, 3
Mercury at a waste site, 413
Mercury biomonitoring, 414, 418
Methyl isocyanate toxicity, 513
Methyl isocyanate, specific characteristics of, 515
Microfluorometric measurement of alkoxyresorufin O-dealkylase activity in single cells, 180

Neurobehavioral testing, 415, 419
New developments in microscale separations and mass spectrometry, for biomonitoring, 147
Novel biomarkers of genetic damage, 349

Optimization of protein digestion, 353
Ovalbumin inhalation challenge, 119

P-450 activity detection in single cells, 177
p-xylene exposure, 132
p-xylene exposure and virus infection, 129
Panel discussion, development and application of biomarkers, 465
Paraoxonase, a biomarker for susceptibility, 337
Pesticide exposure and micronuclei frequency, 405
Polycyclic aromatic hydrocarbons, recent research on, 210
Polymorphisms and intraindividual differences in carcinogen-activating P-450s, 303
Porphyrin profiles in the European starling, 47
singe cells, 183
Poster abstracts, 445
Prenatal effects of hexachlorocyclohexane in mice, 105
Probenecid addition on localization of resorufin fluorescence in program to validate biological markers, 360
Purification and acrylamide adduction of human hemoglobin, 163

Radiation interactions, mechanisms of, 283
Raman spectroscopy of DNA adducts, 195
Renal uptake of mercury and albumin, 77

Scanning laser cytometry, 180
Site of toxicity, 427
Sturnus vulgaris, 47
Subfertility and infertility, 426

Technical hexachlorocyclohexane, 105
Timing of ovulation, 425
Tissue eosinophilia, 123
Tissue and plasma oxytetracycline in calves, 35

Urinary porphyrin profiles as a biomarker of mercury exposure, 235

Vascular toxicity in vitro, 61
Virus-infected mice exposed to p-xylene, 129

Western blot analysis, 321
